EXPERIENCE

In-house Web Developer

HandyCash Home Credit Ltd.

January 2025 - Present

- Developed and maintained production web applications serving internal business operations.
- Designed and implemented new business features across CRM and admin systems based on stakeholder requirements.
- Migrated the company's frontend to Vue.js and Tailwind CSS, improving maintainability and modernizing the UI architecture.

Full-stack web developer

Freelance

December 2023 - Present

- Collaborated with senior engineers to design and implement RESTful APIs in Next.js frontend.
- Built reusable Vue and React components and responsive user interfaces.
- Implemented audit trails and history tracking systems using MySQL triggers.
- Performed debugging, maintenance, and performance optimization.

PROJECT

VIVIPINS (Dynamic Page Builder Platform)

- Developed a dynamic page-builder system allowing administrators to create reusable content templates.
- Implemented nested blocks, repeaters, dynamic field generation & drag-and-drop functionality
- Built dynamic frontend rendering based on backend-defined templates.

HANDYCASH DIGITAL LOAN (Customer Relationship Management System)

- A multi-vendor CRM that can maintain loan issued by a customer.
- Persisted sorting and scheduling data through database integration.
- Improved workflow efficiency through intuitive user interactions.
- Designed automated history tracking for critical business entities.

MAX PURCHASE PRICE CALCULATOR

- Built secure admin modules for managing companies, calculator leads, contact inquiries, user profiles, and password updates.
- Integrated dynamic page layout management, lead tracking, soft deletes, validation, and third-party services such as GoDaddy DNS and GoHighLevel API support.
- Created REST API endpoints to serve company-specific branding, page layout content, calculator data, and contact form submissions.

TRUE FARMERS AGRO

- Built a full-stack farm management system, created modules for projects, crops, sowing details, fertilizer tracking, spray scheduling, and crop yield management.
 - Developed financial workflows for income, expenses, payroll, rented assets, asset purchases, and inventory tracking, with automatic expense and stock updates.
 - Created reporting features including dashboard income/expense summaries, payroll reports, payslip generation, and PDF downloads using DomPDF.
 - Implemented role-based access control with users, roles, permissions, Laravel Gates, and project-specific authorization.
-

EDUCATION

Bachelor's Degree

National University • Dhaka, Bangladesh • September 2024
